

Multipurpose Reloading Complex has increased financing of development programme by 41%

26 April 2017

Since the beginning of 2017 “Multipurpose Reloading Complex”, LLC (MRC) in the port of Ust-Luga (Leningrad region) has spent 23.1 mln roubles for the development of its production capacities, which is by 41% more than during the same period of last year.

The main funds – 22.8 mln rbls – have been spent for technical upgrade of the terminal. For instance, in order to optimize operating procedures and carry out loading-discharge activities MRC bought two material handlers LIEBHERR with clamshells of 2.5m³ capacity each. Also, the company transferred the advance payment for four additional clamshell attachments LIEBHERR GM 20B 2.5m³ each. The new equipment will ensure trouble-free handling of loose cargoes at the terminal.

Besides, in the 1st quarter of this year MRC spent 0.3 mln rbls for topographical survey performed for the purpose of design and construction of the new railway yard.

Reference:
