

Multipurpose Reloading Complex has doubled financing of its development programme

28 July 2017

In the first half of 2017 “Multi-Purpose Reloading Complex, LLC” (MRC) in the port of Ust-Luga (Leningrad region) spent 44.6 mln roubles for the development of its production capacities, which is twice as much as during the same period of last year. The funds were mainly spent for renewal of equipment.

For instance, in order to optimize loading-discharge activities and ensure trouble-free handling of loose cargoes MRC bought two material handlers LIEBHERR with clamshells of 2.5m³ capacity each. In addition the company bought four removable clamshells LIEBHERR GM 20B of 2.5m³ capacity.

During the reported period MRC remitted payment for project preparation works on technical upgrade of the terminal’s facilities, as well as for topographical survey to be performed for the purpose of design and construction of the new railway yard. The funds were also spent for the upgrade of solid waste storage ground.

For information:

“Multipurpose Reloading Complex”, LLC – cargo terminal in the port of Ust-Luga, Leningrad region, specializing in accepting, storage and export/import shipments of general and bulk cargoes. The main cargo is export power coal.
