

Multipurpose Reloading Complex doubles its investments in development

21 May 2018

In the first quarter of 2018, OOO Multipurpose Reloading Complex (MRC) spent more than RUB 49 million for the development of its production facilities, which is twice as much as in the same period of the previous year.

More than 70% of that amount was paid for new handling equipment, part of which was acquired by the company earlier. First of all, that equipment includes two LIEBHERR LH 40M material handlers and four LIEBHERR GM 20C grabs of 2.5 cbm each. Besides, the company made an advance payment for the works on modernization of its two Aist cranes.

The growth of investments was also driven by implementation of the front end engineering design under the project on expansion of the terminal capacity. Specifications for modernization of utilities are currently underway.

About Multipurpose Reloading Complex:
