

Performance of Multipurpose Reloading Complex in H1'2018

31 July 2018

In the first half of 2018, OOO Multipurpose Reloading Complex (MRC) operating in the port of Ust-Luga (Leningrad Region) handled 2.51 million tonnes of cargo, which is 10% less as compared with the same period of 2017.

The decrease should be attributed to the challenging ice situation in the water area of port Ust-Luga in the beginning of the year.

In the six-months period of the year the terminal handled 2.43 million tonnes of steam coal and 79,000 tonnes of petcoke. Average daily handling of railcars - 190 units, maximum handling of railcars - 316 units per day. Total handling of railcars in the reporting period - 34,394 units.

About Multipurpose Reloading Complex:

OOO Multipurpose Reloading Complex (MRC) is a cargo terminal in the port of Ust-Luga, Leningrad Region, specializing in unloading, storage and loading of general and bulk cargoes. The main cargo is export power coal. In 2017, OOO MRC handled 5.5 million tonnes of cargo.
