

Happy New Year!

29 December 2018

Dear colleagues,

Merry Christmas and Happy New Year!

It is quite common to sum up the results at the end of the year, especially since this year we celebrate our anniversary. We had impressive celebration of the first decade of MPRC operation, we rewarded our team members, we received the acknowledgements from our region and district administrations for cooperation in the framework of social partnership projects.

As far as the machinery and equipment modernization is concerned, year 2018 turned out to be as intense as never before. We put new material handling machines and lift trucks into operation, we commissioned new gantry crane and updated the existing ones.

Modernization powers up our ambitious plans. Although we started from the projected three million tons of cargo a year, we plan to increase the throughput of MPRC up to eight million. To achieve this goal we will develop the railway infrastructure and will expand the railway unloading area.

Our company heads for onward development, which is sustained by trust and support of our team. It is only the professional competence of the team that made MPRC the industry leader and winner of the competition hosted by the Federal Agency for Maritime and River Transport.

I wish you to fulfill all your plans for the next year, to be healthy, successful and happy in your personal life. May all the wishes you and your significant others make during the New Year's Eve come true!

Managing Director of "Multipurpose Reloading Complex" LLC Sergey Chelyadin
