

Kingisepp gets a present from Multipurpose Reloading Complex

9 March 2021

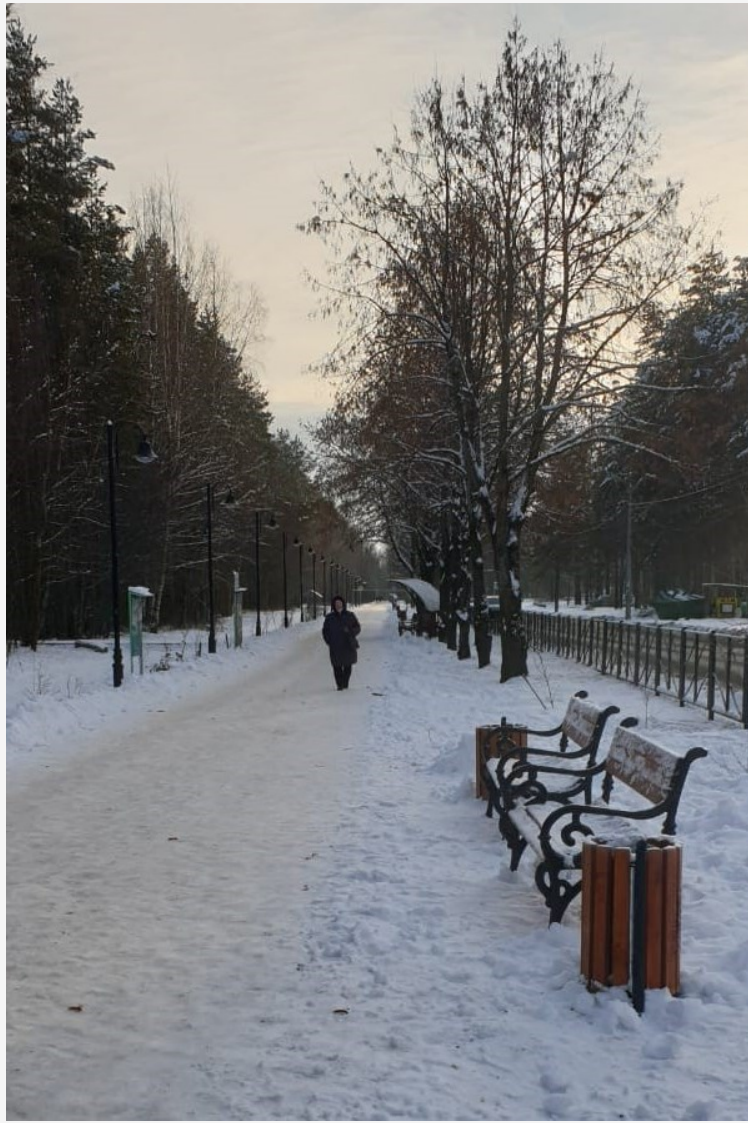

With the assistance of Multipurpose Reloading Complex LLC operating in the port of Ust-Luga, the town of Kingisepp got a comfortable pedestrian area along the Vostochnaya street. It was named the Alley of Port Workers.

The area is among the town's largest recreational zones where the citizens spend their leisure time. It used to be dark and neglected, hence the majority of votes – 80% – for its development at the website of Kingisepp municipal administration.

MRC allocated resources for the project based on the principle of “a pedestrian transit with short rest opportunities”. The task was to preserve most of planted areas while improving the landscape.

In the result, the Vostochnaya street now has sidewalks with street lights, benches and litter bins. The pedestrian part is separated from the driveway with a new fence. The territory looks polished now.

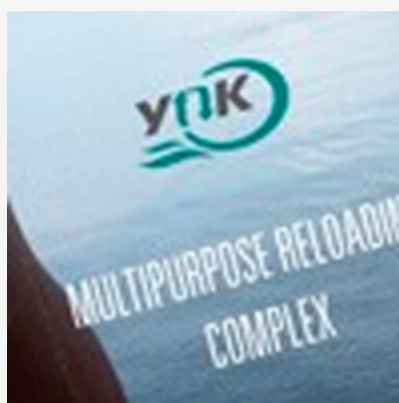

It is not the first contribution to the town. The terminal earlier participated in the development of social facilities in Kingisepp, such as a municipal library of family use.
