

# In 2014 the turnover of “Multipurpose Reloading Complex” grew by 15%

21 January 2015

Within 12 months of 2014 LLC “Multipurpose Reloading Complex” (MRC) handled 4 mln tons of cargoes which exceeds by 15% the indicators of the same period of the last year. The growth of indicators is caused by increase of handling volumes of power generating coal-main cargo of the company due to stable high demand for energy materials in Europe.

The company ensured positive dynamics by the implementation of the programme on technical re-equipment. Due to putting into operation of new equipment – two MANTSINEN 120R manipulator-cranes and two KOMATSU WA420-3 front loaders MRC increased the speed of handling of railcars. Average day discharge amounted to 157 open-top railcars which is by 16% more than in 2013, maximum discharge amounted to 276 open-top railcars. In 2014 57 225 open-top railcars with coal were discharged at the berths of the company.

All in all within the reporting period the terminal handled 103 transportation vessels.

*Reference: LLC “Multipurpose Reloading Complex” is a cargo terminal in the port of Ust-Luga in the Leningrad region, specializing in acceptance, storage and shipment of export and import general and bulk cargoes. Main cargo reloaded by the company is export power generating coal.*
